Experienced Quality Assurance Engineer

Łódź, Poland

irina.shkliarenko@gmail.com | <https://www.linkedin.com/in/iryna-shkliarenko/>

Professional Summary

ISTQB-certified QA Engineer with 9 years of experience in manual and automated testing, primarily in mobile and automotive domains. Skilled in test planning, execution, and QA process improvement in Agile environments. Recognized for strong analytical thinking, quality ownership, and mentoring within cross-functional teams.

Core Skills

- Languages: Bash, Python, Java (basic knowledge)
- Tools & Platforms: Git, GitHub, Android Studio, Jira, Confluence, Xray
- Testing & Automation: Manual Testing, Test Planning, Test Case Design, Cucumber, Calabash, Behavior-Driven Development (BDD)
- Methodologies: Agile (Scrum/Kanban), CI/CD pipelines

Professional Experience

Senior Quality Assurance Engineer

TomTom, Łódź, Poland

Mar 2020 – July 2025

- Acted as QA owner within a feature delivery team, covering test planning, execution, and coordination with the broader QA group
- Designed and implemented test plans and test cases to ensure comprehensive feature coverage
- Executed functional, regression, and non-functional testing (KPIs, basic performance) in embedded and mobile environments
- Created and maintained automated test scenarios using Cucumber (BDD), contributing to improved regression efficiency
- Participated in refinement and planning sessions to align QA activities early with product requirements

Quality Assurance Engineer

TomTom, Łódź, Poland

Aug 2017 – Feb 2020

- Performed manual testing activities for a high-visibility consumer navigation app - TomTom GO Navigation (Android) - used by millions of users worldwide
- Collaborated closely with developers, designers, and product owners in an Agile environment to ensure product quality across releases
- Developed and maintained initial automated test scripts, contributing to broader test coverage
- Actively monitored customer feedback from beta forum and contributed to issue triaging and prioritization
- Won multiple company-wide Bug Bash competitions for identifying critical issues ahead of release

Quality Assurance Intern

TomTom, Łódź, Poland
Aug 2016 – Aug 2017

- Contributed to testing and quality assurance of a navigation engine SDK as part of an Agile development team
- Performed manual testing, documented defects, and supported the QA team in ensuring product stability
- Gained hands-on experience with QA processes, tools, and collaboration in a cross-functional setup
